

MINTECH

CHEMICAL GASBAG

The Mintech CGB series is a range of chemically inflated gasbags designed to offer simple and easy borehole plugging. CGB gasbags do not contain any metallic components with the added advantage of producing a non-hazardous, non-toxic and non-flammable inflation gas.

Made tough (Constructed from robust materials)

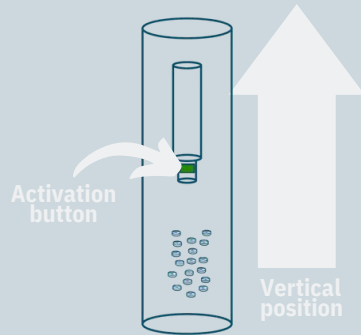

Superior storage (1 year +)

Consistent inflation time and final bag pressure

Simple activation process

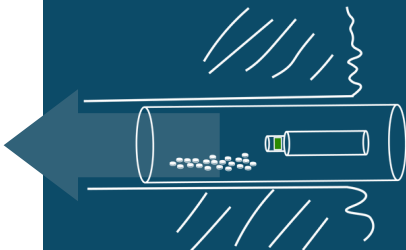

ACTIVATION

- 1 Hold the chemical gasbag in a vertical position
- 2 Push the green activation button
- 3 Citric solution will begin to drain from the bottle and react with the Sodium Bicarb tablets
- 4 Shake the chemical gasbag to ensure products mix well

INSTALLATION

- 1 Position chemical gasbag in the hole -tablets facing downward
- 2 Gasbag can be installed bottle end first or tablet end first
- 3 Gasbag will lock off in 4-5mins
